

TEAM ID: PNT2022TMID24432

Create a cloud object storage service

Step:1

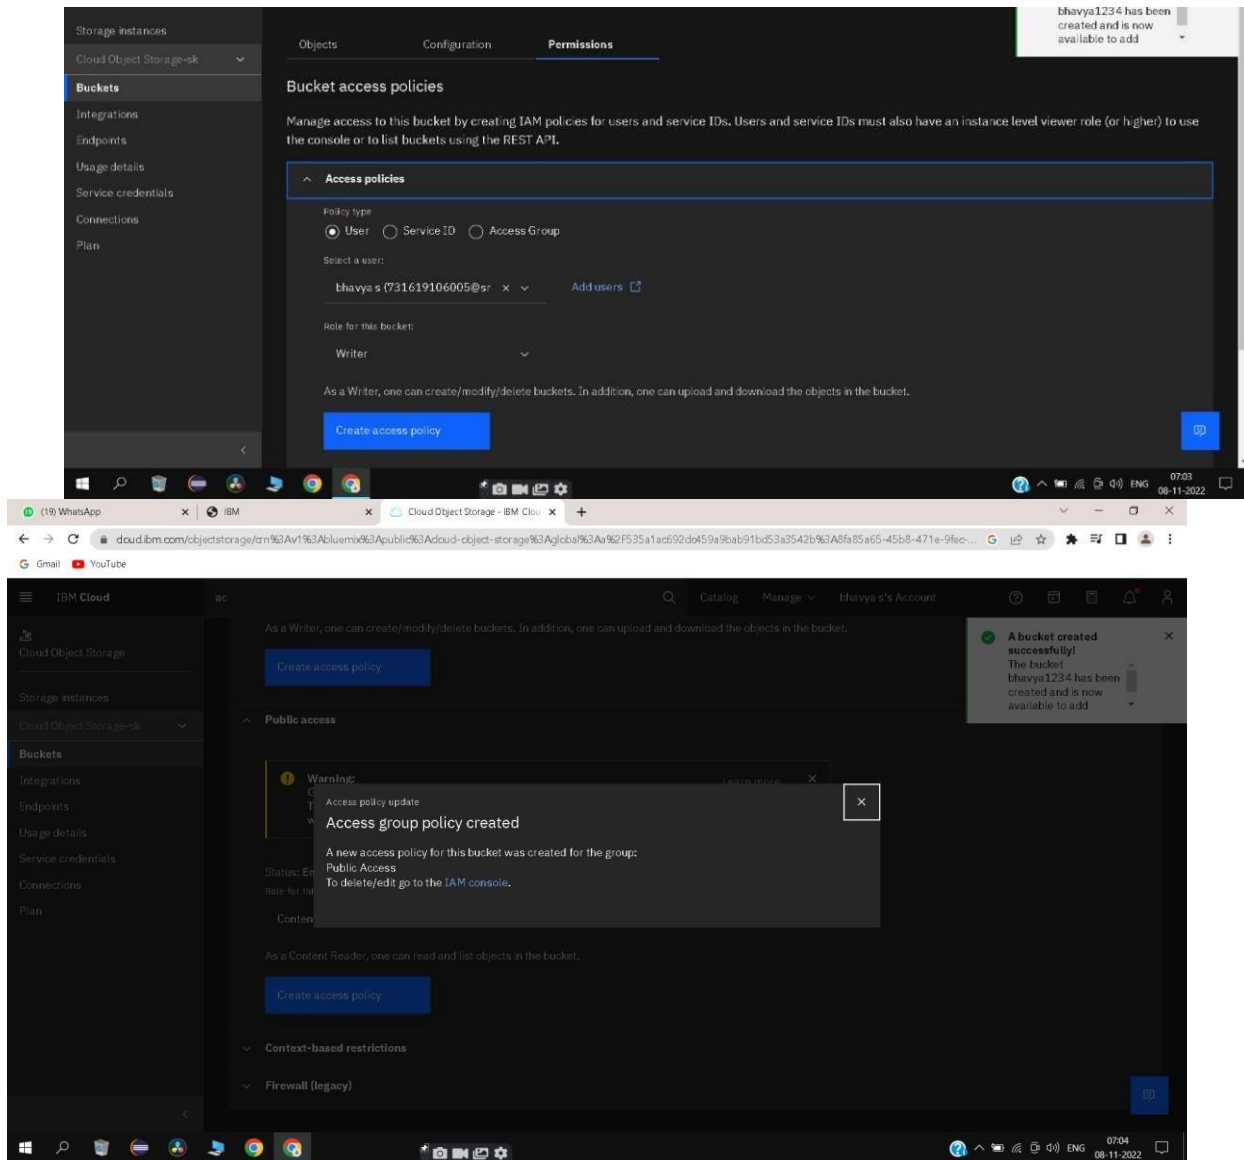

Step 2:

Step 3:

Step:4

Step:5

The screenshot displays the IBM Cloud Object Storage console interface. On the left, a sidebar menu lists navigation options: Cloud Object Storage, Storage instances, Cloud Object Storage-sk, Buckets, Integrations, Endpoints, Usage details, Service credentials (highlighted), Connections, and Plan. The main content area is titled 'Service credentials' and includes a sub-header: 'You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)'. Below this, there is a search bar and a table of credentials. The table has two columns: 'Key name' and 'Date created'. One credential is listed: 'Service credentials-1' with a creation date of '2022-11-08 7:07 PM'. A 'New credential' button is located in the top right of the table area. Below the table, a code block displays the JSON structure of the generated credentials, including fields for 'apikey', 'endpoints', 'iam_apikey_description', 'iam_apikey_name', 'iam_role_crn', 'iam_serviceid_crn', and 'resource_instance_id'. A success notification in the top right corner states: 'A bucket created successfully! The bucket khavya1234 has been created and is now available to add'.

Service credentials

You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)

Search credentials...

Key name	Date created
Service credentials-1	2022-11-08 7:07 PM

```
{
  "apikey": "00uANV1V02A0nuU4wCCtWp8e5X7MMihujn6KCW96VH",
